

CONSTRUCTION PROCESS

Open Trenching

- 1 Crews will dig a trench and remove the natural gas line.
- 2 The new natural gas line will be placed in the trench.
- 3 Steel plates may be used to maintain driveway access.
- 4 Traffic control measures will be in place for construction crews and public safety.

HDD Boring

- 4 Traffic control measures will be in place for construction crews and public safety.
- 5 Crews will stage natural gas line at the bore entry pit.
- 6 Crews will pull the line through to the bore exit pit.
- 7 Horizontal Directional Drilling (HDD) Bores will allow natural gas line installation under railroad tracks, major roadways or environmentally sensitive areas.
